Luna XIO

# Real-Time Visibility. Made Easy.

The Need for Real-Time Visibility

Condition monitoring

Supply chain visibility

Process optimization

Inventory management

Last mile delivery

Data and analytics

The Solution: Luna XIO

Right sensor for the right asset
Works on nearly all Bluetooth-enabled devices and tags.

No additional infrastructure
Transforms any Bluetooth-enabled device into a tracker and gateway.

Feeds into existing systems
Integrates with existing TMS or WMS applications.

Pay-As-You-Go
Payment based on utilization.

Simple & Reliable Real-Time Visibility

- **Pulls ALL shipment data into one platform:** Multi-vendor data feeds into a single system
- **Helps meet compliance and performance KPIs:** Act on alerts and notifications as events occur
- **No downtime:** Basic set-up in less than a week, no changes to existing workflows
- **Pervasive shipment monitoring:** Software-based gateways enable greater visibility
- **Zero-touch; Zero Trust:** Bi-directional encrypted communication, rolled out without manual configuration, passwords

Luna Tracker Features

Real-time visibility

Real-time tracking for shippers, logistics providers, and end customers.

Condition monitoring and alerts

Be alerted to changes in shipping conditions or long dwell times.

Gapless, limitless and lossless

Seamless, unlimited, and accurate data transmission.

Simple Set Up

1

Download Luna Locate app from app stores.

2

App transforms existing infrastructure mobile devices into gateways.

3

Choose the best-suited trackers or sensors for your application. Luna XIO will provide the firmware.

4

Gateway-enabled devices receive info from sensors, and provide real-time location and condition data to the Luna XIO system.

5

View device locations, perform actions, and conduct asset audits through user-friendly mobile and desktop apps.

6

Customize dashboards, reporting, and analytics to enhance asset visibility and operational efficiency.
